

Vanuatu Government Scholarship Change of Programme/Course Application Form

General Information: Awardees are selected on the basis of the Selection Criteria which takes into account Vanuatu's urgent need for increases in skilled manpower in specific areas.

A very sound case needs to be made by the awardee, institution and sponsor before changes to field or level of an awardee's course will be approved. Awardees who change their course level or their field of study without prior approval from the Scholarships Unit will not be granted any extension to their awards. Double major must be within the initial program of study and the length of study award.

The Scholarships Unit's approval of an awardee's request to change their field of study will include consideration as to whether the;

- i) awardee has genuine and valid academic and vocational reasons for the change
- ii) requested field of study is listed as a priority field for training
- iii) requested change will not affect the length of study award
- iv) request is approved by any employer, institution and sponsor.
